

ERP, Microsoft Dynamics NAV 2013, QlikView, Qlik Sense, Connector

Connector integrates Microsoft Dynamics NAV 2015 with QlikView solutions

prisma informatik is exhibiting at Convergence (Fira Barcelona Gran Via Conference Centre, Barcelona, 4 – 6 November 2014): Hall 8, Booth 98

Nuremberg (Germany), October 22, 2014. A connector that quickly integrates the latest version of Microsoft Dynamics NAV with the Qlik Business Discovery software will be presented at Convergence in Barcelona. prisma informatik, Microsoft Dynamics NAV Gold Partner located in Nuremberg, Germany, provides the certified NAVdiscovery Toolbox for connecting the ERP system with the Qlik solutions. It works for both QlikView and Qlik Sense, which has just been released. By integrating the Business Discovery software of Qlik, Dynamics NAV users can easily analyse and explore their complex business data for meaningful insights. Unlike traditional Business Intelligence (BI) systems, QlikView and Qlik Sense are genuine self-service BI solutions. These solutions empower individual users to generate new queries and dynamic dashboards at any time, without the need for deep knowledge of IT or for IT support from administrators or business analysts.

Developed by prisma informatik, the connector delivers no pre-built script but can transfer any bespoke extension and customisation within Microsoft Dynamics NAV, even if the database has been significantly customised. Furthermore, the solution offers a lot more features that will be presented at the Convergence exhibition.

"To get rich BI capability combined with a satisfying user experience, our connector is the right solution for Microsoft Dynamics NAV 2015 together

with QlikView or Qlik Sense. It increases the analysis capabilities of the ERP system and offers self-service BI benefits integrated into Dynamics NAV, while maintaining the full interactivity of the Qlik applications“, says Jens Thamer, Managing Director of prisma informatik.
